

Manual for “Lead Assistant” Application

Check Before You Open Application

1. There is a folder called media, it has to have a Images of what's button and icons. Make sure you have this folder with file. If what's up web design updated, you can replace old button image in folder by new image of button (screenshot what's up page, then crop it so only button left in screenshot, then rename image file you did with name of button that were in 'media' folder, for example 'wp_audio_button.png'), all images has to be '.png' format.

After You Open Application.

1) Before starting sending messages,

you have to create an template for messages with at least English Language. Then you have to select excel file with phones. You Also have to add some number with Whats up to send report to it, so you can start application and go do some other things, and get notified when its finished.

2) To add Templates of messages,

2.1 press “Load Intro”,

2.2 Then press “Add Text”

2.3 Write language for this Introduction for example English

2.4 Write Text for introduction in language you entered, for example in English: Hello my name is Jack, I am writing you about...., (You can copy paste it from Whats up)

Length of Introduction Text should be less than 1024 characters, otherwise, whats up would let to attach files to message. You Can count char on this web site: [🌐 Online Character Count Tool](#)

2.5 Add Attachment (Photo, Video) for this text by pressing “Add Attachment”, If you want

2.6 Enter Language for this attachment, and pick up file for this attachment , For example for English language choose Video In English. If later you change files with video or photo (Delete, relocate, change name of file) application will not work, you have to create template from zero again with new files.

FILES FOR ATTACHMENT CANNOT HAVE EMPTY SPACES IN THEIR NAMES!!!

FOR Example you can not name file “Intro English Video.mp4”, it can be “Intro_English_Video.mp4”

2.7 Save template By pressing save template and save somewhere in your computer, next time, simply load it by pressing “Load Template” . So you Enter intro only one time.

3) To Edit Templates of messages,

Press “Load Template” choose template, press add text , enter Language and Enter New Text for This Language. Same work for Attachments.

4)After you Loaded Template, Load Contacts

Press “Load Contacts” , choose excel file with numbers from your computer,

File with numbers has to be Microsoft Excel Worksheet (.xlsx) format,

File with numbers has to have column named “Phone” with numbers in it

Numbers should be full phone number with or without empty spaces, with or without ‘+’ sign

5)Add Number for Notification

You Need to add whats up number to get notified when work starts and when it finishes. Add Your Whats Own Whats up number.

Add it in this way: +905373332244

6) Open Whats Up Web Application, so all buttons (Send message, attach file, search contact) are visible.

7) Press Start to Start Sending Messages.

Dont move mouse while assistant is working! dont turn off the screen! keep charger connected ! keep internet connected !

8) Pause during work

If you want to pause assistant, you press “Left Shift” Button One Time, and wait until it stops finishing sending message (Usually wait for 30 seconds). If you want to check how many contacts left press “Show Progress” Button. To continue open whats up web application page and press “Left Shift”.

Languages:

All number automatically detected with their language, If you add Introduction Text with Their Language, and attachment with their language , it will send it in this language. If there is no introductions in this language, it will send English Introduction. If There is no English Language then send any introduction in Catalog.

Here is a list of phones and languages they connected to:
